Technical Specifications

- 0,2 ml water based vaccine injector with standard calibrated dosage control system
- 0,1 ml standard calibrated oily vaccine injector
- Vaccine type options: water, water + oil, oil + water and oil based
- Targeted chick quantity and total application quantity display
- Electronic needle depth adjustment. No additional adjustment process is necessary
- High sensitivity of injector compressor. Easy vaccine take due to specially designed vacuum pump on the injectors. No vaccine loss
- Gives alarm when pre-set chick quantity is achieved without interrupting the vaccination
- Fast injection technology in Orchestra series eliminates problems like insufficient vaccine intake, bleeding and mortality
- Complete pneumatic system can automatically apply maintenance and greasing. (Optional)
